

# Investigating Ways to Improve Relationships Between Mothers and Children with Autism Spectrum Disorder

## ***Calling all MUMS out there!***

You can be part of our research if you:

- have a child with an ASD diagnosis who is between the ages of 3-7
- are the primary caretaker of the child
- are currently residing in Singapore (need not be Singaporean)

### **PART 1: ONLINE QUESTIONNAIRES**

- Done in the comfort of your home
- Takes an hour to complete
- To obtain information about mother-child relationship

*This is a paid study*

### **PART 2: COLLECTION OF SALIVA SAMPLES**

- Participants can choose a convenient location:
  1. SAN Lab in NTU
  2. Participant's own home
  3. Child's centre
- Takes less than 10 minutes
- For the investigation of the influence of genes on mother-child relationship
